Senate Passes Digital Access to Drivers Licenses and Non-Driver ID Cards

CONCORD, NH – Senator Tim Lang (R-Sanbornton) released the following statement today on the passing of SB 70-FN, creating a mobile driver’s license and non-driver identification card:

“We have access to many different documents through our cell phones and this bill adds a digital identification to that list. This new approach modernizes our state and streamlines the age verification and identification processes. Our youth always have their phones on them and having access to their IDs digitally means they will never leave home without it. Digital IDs modernize our Department of Motor Vehicles and prepares New Hampshire for further access to identification in the future.”

Background: SB 70-FN creates a mobile driver’s license and non-driver identification card. This process has been approved in seven other states and streamlines age verification and identification in line with TSA standards. People would still need to provide physical identification if requested by law enforcement. Senator Lang is the prime sponsor of this bill.
